Art Therapy in Community

On mid June of 2024 and for three whole weeks, the group art therapist and visual artist Amancaya Xristina is travelling from Greece to Belgium thanks to a cultural mobility grant from the Creative Europe programme, for a wonderful and colorful collaboration with the initiative of

the Kiosk, a social hub in Antwerp where it works with the neighborhood partners (care, welfare, education, culture, government, traders, school, Community Health Workers) where mental health is one of the most important topics.

Heart & Art therapy project enables a space of healing through creative interaction and exploration. Community people in difficult socioeconomic situations from different paths of life meet, create and exchange.

The focus is on sharing, expression and self - awareness. The main idea of this collaboration is to interact with the communities in the Kiosk's network and share tools of creative expression through art therapy, group workshops, and close with an art exhibition of all the creations made.
